

Instructions for commissioning the emsys Box

We are pleased that you have chosen our product. Please follow the steps below to successfully commission the emsys Box:

1. Step Plug the emsys Box onto a DIN rail in the junction box.
2. Step *(optional)* Plug the enclosed LAN cable into the "ETH0 - LAN" port and connect it to the target device at the other end.
3. Step Plug the enclosed LAN cable into the "ETH1 - WAN" port and connect it to the local network at the other end.
4. Step Apply power by plugging the power adapter into the white "PWR" connector. You can also wire the 24V power supply to an existing power supply.
5. Step Confirm the installation of the emsys Box by e-mail to **esb@emsysvpp.de**.
